SUMMARY

Cybersecurity-focused Computer Science student with hands-on experience in Docker-based sandboxing, Linux. Skilled in Python, AWS security services, vulnerability assessment, and DevSecOps practices. Passionate about improving security posture through threat detection and secure development.

EDUCATION

St. Joseph's Institute of Technology

B.E. Computer Science Engineering

OMR, Chennai Sep. 2023 – Present

Alwin Memorial Public School (AMPS)

Standard 12

Tambram, Chennai . 2022 – 2023

SKILLS

- **Cybersecurity :**
Security Monitoring, Incident Response, Vulnerability Assessment and Management, SIEM, Nmap, Metasploit.
- **Programming & Tools:**
Python, GitHub, Docker, MongoDB.
- **Cloud & DevSecOps:**
AWS, Cloud Security Fundamentals, Cloud Security Posture Management (CSPM).
- **Frameworks:**
Zero-Trust Architecture, MITRE ATT&CK, OWASP Top 10, Risk, Compliance, GDPR.

EXPERIENCE

National Small Industries Corporation Technical Service

Cyber Security intern

Ekkaduthangal,
Chennai Feb - March 2024

- Performed Linux system administration and conducted Vulnerability Assessment and Penetration Testing (VAPT) using Nmap and Metasploit, identifying security vulnerabilities
- Identified open ports, enumerated services, and analyzed vulnerabilities to assess security risks and potential exploitation paths, Documented identified vulnerabilities and provided basic remediation recommendations.

Women in CyberSecurity (WiCyS), St. Joseph's Institute of Technology

Research Intern – CAIR Project | Jul– Nov 2025

- Collaborated with faculty and international teams on AI research, contributing to documentation and deliverables
- Participated in research discussions and project tasks, gaining experience in collaboration and applied AI

PROJECTS

Zero-Trust CLI: Secure Software Installation Using Docker Sandboxing

- Enhanced a Zero-Trust CLI tool to securely analyze and execute untrusted software.
- Used Docker sandboxing to monitor network activity and privilege escalation attempts.
- Implemented a risk-scoring engine to prevent malicious code execution on the host system.

LLM Offensive Prompt Generator

- Developed a Flask-based application generating 1000+ adversarial prompts aligned with OWASP Top 10 for LLM security testing and input validation.
- Evaluated model robustness against prompt injection attacks and malicious inputs to identify security vulnerabilities.

CERTIFICATIONS

- CEH v13 AI (Certified Ethical Hacker) – Currently Pursuing
- (ISC)² Certified in Cybersecurity (CC)
- Certified Network Security Practitioner (CNSP) by Secops
- AWS Certified Cloud Practitioner
- Certified Junior Web Penetration Tester
- Cisco-Networking Basics
